AN ARTISTIC BOUDOIR.

All the Furniture Should be in White Enamelled Wood.

In furnishing an artistic boudoir, says the *National Builder*, the bed and all the furniture should be in white enamelled wood, with delicate little white railings as a finish to each piece, and fine lines and touches of gold as a relief. All the white furniture upholstery should be in the same shade. These walls are in the same shade, with broad frieze of nautilus, and over the mantel should be hung a white-framed mirror, with pale green China silk printed with the same flowers, which are also embroidered on the fringe of the white linen bedspread. Little white screens are hung with silk, and all the furnishing of the dressing table and toilet should be of ivory.

In small *lowdown* large cabinets are, of course, a mistake, and the low-priced small ones—until quite lately—were far too ordinary in outline and general effect to be agreeable. There has, however, recently been brought into vogue a species of decorative furniture which might also be described as a substitute for the cabinet. It is certainly not a cabinet in the usual sense, but it answers all the purposes of one, and is far more pleasing in appearance than the former.
